INTRODUCING

## SPEED TORQUE

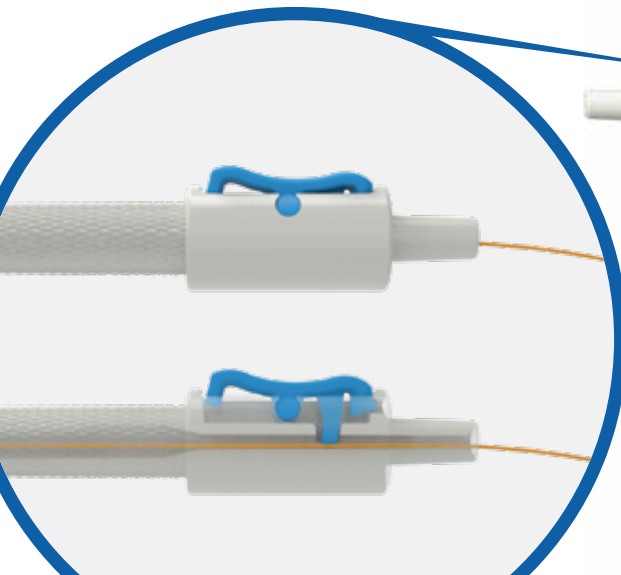

**Speed-Torque** unique, patented design enables physicians to manipulate a guidewire comfortably with one hand, freeing up the interventionalist's other hand and enabling them to keep their full attention on the patient and the percutaneous guidewire rather than on the torque device. Speed-Torque will ultimately save Interventionalists time, hospitals money, and improve patient safety.

# SPEED & EFFICIENCY

## FEATURES

- Click & Lock Toggle
  - Luer Tip
